CONGRESS**
Edmonton 10 - 12 March 2008

Unconventional Oil Challenging Conventional Wisdom

CALL FOR PAPERS

The World Heavy Oil Congress is the world's premier international technical and business conference and exhibition specializing in the heavy oil industry. The importance of bringing heavy oil to the global market in order to satisfy the world's thirst for energy is becoming increasingly key. The technological and strategic challenges that arise in bringing this rich resource to fruition will be tackled at the World Heavy Oil Congress by producing companies and expert professionals in the industry.

The technical program committee is pleased to invite you to submit paper proposals and offers the following list of session themes as a general guideline. Submissions not fitting into this list, but relevant to the general topic of unconventional oil development, are also welcome and will be given full consideration for inclusion in the program. Case studies, field test and pilot results are all welcome.

Topics will feature (but are not limited to):

- World heavy oil reserve evaluation and economic evaluation
- Geology and Geophysics, and wireline logging related to heavy oil
- Heavy oil reservoir description, modeling and simulation
- Thermal recovery of heavy oil
- Non-thermal recovery of heavy oil
- Drilling, completion, stimulation technology and equipment
- Heavy oil production technology, well testing, tools, equipment and well integrity
- Theoretical and laboratory research
- Chemistry related to heavy oil
- Heavy oil gathering, storage and transportation technology and facilities
- Oil sand/oil shale mining and extracting technology and facilities
- Heavy oil and bitumen refining and upgrading technology and facilities
- Cost reduction and energy saving in heavy oil production, transportation, refining and processing
- HSE in heavy oil industry
- Emerging technologies
- Integrated extra heavy oil (oil sands) concepts
